Lagos, Nigeria

SUMMARY

Highly skilled software engineer with 4+ years experience developing secure, performant and scalable web applications using modern technologies and industry best practices. An engineer who is passionate about building enterprise and top-notch products. An enthusiastic team player and deep creative thinker.

As a software engineer, I prioritise the long term goals of a product and the overall business objective in every technical decision. I am dedicated to creating intuitive and visually appealing web experiences that leave a long-lasting impression. I deliver reliable, maintainable and high quality solutions that provide exceptional value to clients. Proficient in React Js, Javascript, Next Js, Typescript, Jest React testing library and various other technologies.

EDUCATION

Enyata Software Training, Lagos Nigeria

Software development - 2020.

University of Lagos

BA History and strategic studies - Class of 2019.

SKILLS

Frontend Technologies and Frameworks

- HTML5 and CSS3
- React Js
- Vite
- Javascript
- Typescript
- SASS
- Next Js
- Redux
- Redux toolkit
- React Query
- Storybook
- Tailwind
- Node Js
- GraphQL
- Test driven development with Jest and React testing library.

WORK EXPERIENCE

Enyata Software Engineering

FRONTEND ENGINEERING INTERN | SEPT 2020 - DEC 2020

- Worked with multiple clients to develop custom websites and web applications leveraging HTML, CSS and Javascript frameworks such as React Js.
- Collaborated with senior frontend engineers to develop and maintain responsive web applications using HTML, CSS, and JavaScript.
- Participated in code reviews and testing procedures, identifying and resolving bugs and performance issues.
- Actively engaged in team meetings and brainstorming sessions, offering insights and suggestions to improve development processes and project outcomes.
- Demonstrated a strong commitment to learning and professional growth, seeking feedback from mentors and actively seeking opportunities to expand knowledge and skillset.

FRONTEND ENGINEERING | DEC 2020 - PRESENT

- Developed custom reusable components in React.js, reducing development time by 40% and improving code maintainability.
- Worked with multiple clients to develop custom websites and web applications, leveraging HTML, CSS, and JavaScript frameworks such as React Js, Next Js,
- Implemented performance optimizations, resulting in a 30% improvement in page load times and a 20% increase in user engagement.
- Facilitated knowledge sharing sessions and code reviews to promote collaboration and learning within the team.
- Mentored junior developers, providing guidance on frontend technologies, coding standards, and problem-solving techniques.

Tools and Development

- Vscode
- Github
- Bitbucket
- Trello
- Slack
- Figma
- Slack
- Skype
- Clickup

Others

- Problem solving
- Pair programming / Collaborative development.
- Eslint
- Prettier
- Excellent communication
- Responsive design
- Cross-Browser Compatibility
- User Experience (UX) Design
- Performance Optimization
- Version control systems: Git.
- Mentorship

FRONTEND ENGINEERING | DEC 2020 - PRESENT

-]Collaborated closely with cross-functional teams including designers, product managers, and backend engineers to define project requirements, establish timelines, and deliver high-quality products on schedule.
- Contributed to the agency's technical knowledge base, documenting best practices, reusable components, and project templates to streamline development processes and improve efficiency across projects.

Zhill Systems

CONTRACT FRONTEND ENGINEER | 2021

<https://resume.zhillsystems.com/>

- Developed and integrated essential features such as customizable templates, real-time previews,
- Ensured the application was fast, responsive, and compatible with all major browsers and devices, optimizing for performance and accessibility.
- Ensured the application was fast, responsive, and compatible with all major browsers and devices, optimizing for performance and accessibility.
- Actively sought and incorporated client feedback throughout the development process, making iterative improvements to align with client expectations.
- Utilized Next.js for server-side rendering and efficient routing, and React Query for data fetching and state management.

Edusko Inc

FRONTEND ENGINEER | SEPT 2022 - DEC 2022

<https://www.edusko.com/>

- Collaborated with a team of developers to build a platform aimed at assisting users in finding and applying to the best schools, providing comprehensive information on admissions processes.
- Utilized Next.js for server-side rendering and efficient routing, and React Query for data fetching and state management.
- Integrated RESTful APIs for backend communication, enabling dynamic content updates and interactions within the platform.
- Developed reusable, responsive components and pages using Next.js, ensuring a consistent look and feel across the platform.
- Developed key features such as user authentication, profile management, search functionality for schools, and application tracking.
- Focused on optimizing the platform's performance, reducing load times, and improving overall application responsiveness.
